Improving America's Health

August Report of the Month:

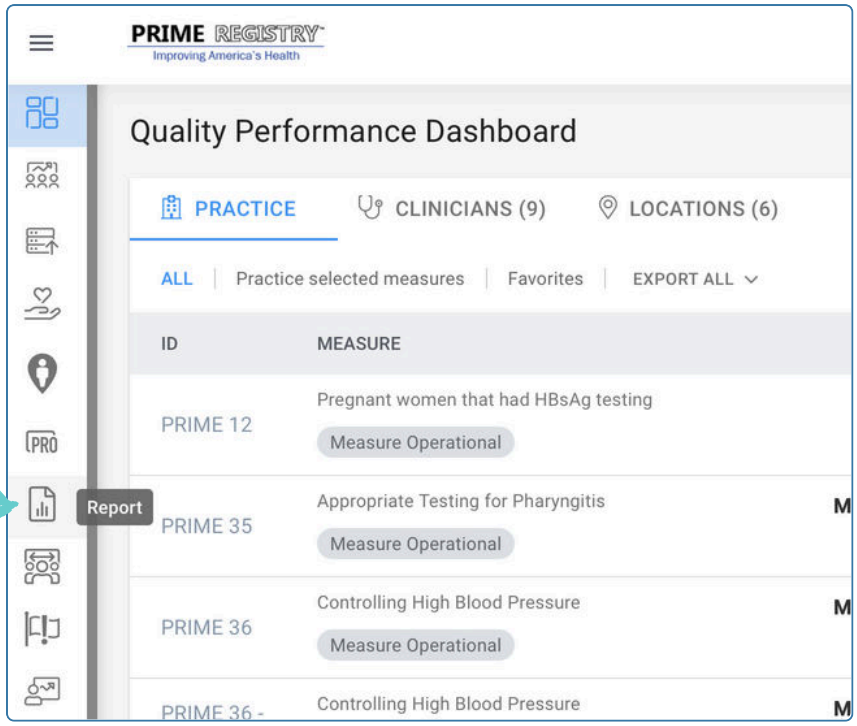
Improvement Activity Report-Group

Learn how one practice uses the Improvement Activities report to identify improvement work they are doing that qualifies for for the Merit Based Incentive Payment System (MIPS) Improvement Activities.

The team of physicians at Roberts Family Medicine prioritize both their time and commitment to practice improvement. With the help of PRIME, they are able to more easily identify the improvement work they have done that qualifies for MIPS.

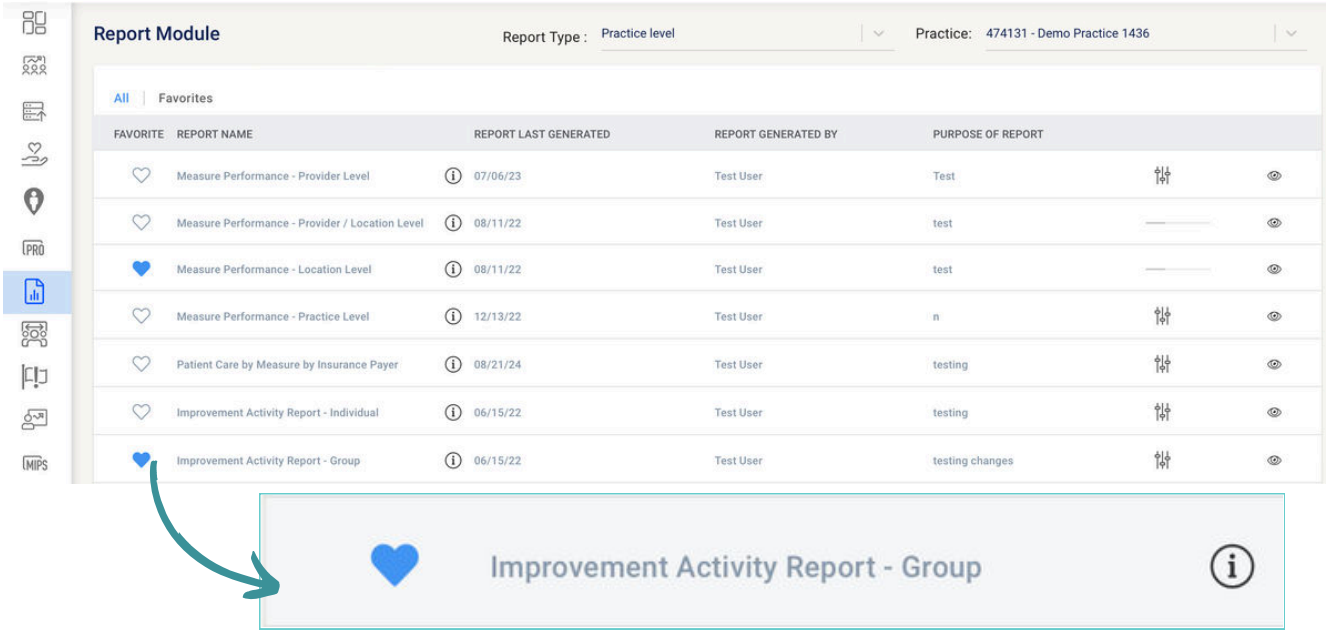
This customizable report is easily accessible in the Reports module within their PRIME Registry dashboard. the Improvement Activity Report – Group was designed to provide performance details for improvement activities at the group level.

First, the QI team logs in to the PRIME Quality dashboard, and navigates to the report module by selecting the Report icon in the left hand navigation pane.



Questions? Contact the PRIME Registry team at the ABFM for help!
primeteam@primeregistry.org

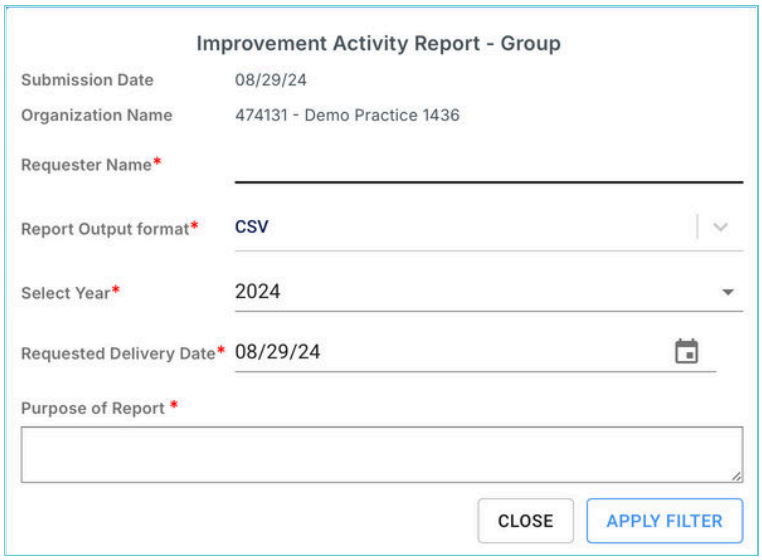
Next, they locate the **Improvement Activity Report - Group** report in the list view.



Next, they select the **filter icon**, in the bar to the far right of the report title.

Filter Icon

A window pops up, where it's easy to customize the report. They can choose report output formats--**xls, csv, or PDF,** and select the reporting performance year. They can also choose the requested delivery date. They can produce the reports they need in real time, and on future dates.

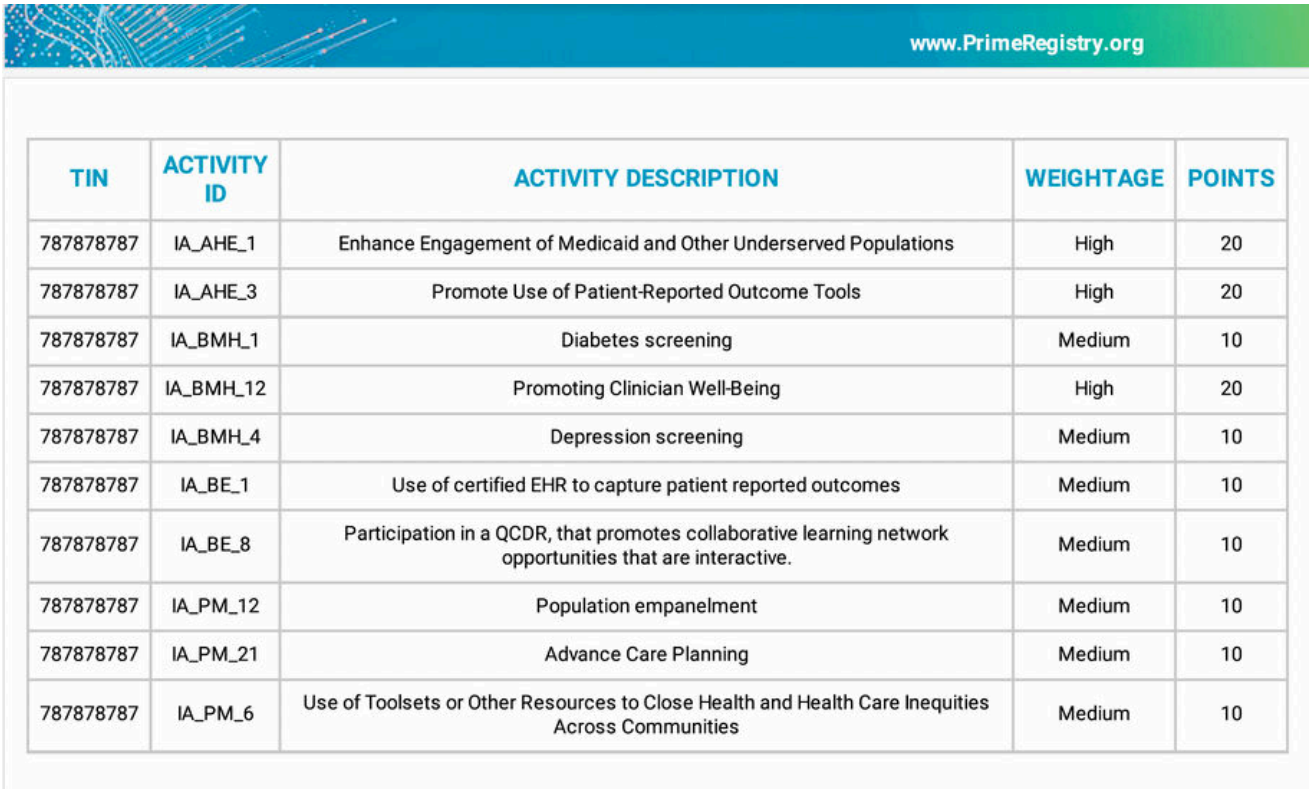


After selecting **Apply Filter**, a report will generate in their selected format.

This report will provide improvement activity information at the group level such as TIN, Activity ID, Activity Description, Weight Age, Points. (See next page for example report output.)

If they choose a report to run on a future date, they simply return to the Report tool dashboard on the date needed, and click the EYE icon* at the far right in the reports list view (shown above) to view the recently run report.

Example report output:



TIN	ACTIVITY ID	ACTIVITY DESCRIPTION	WEIGHTAGE	POINTS
787878787	IA_AHE_1	Enhance Engagement of Medicaid and Other Underserved Populations	High	20
787878787	IA_AHE_3	Promote Use of Patient-Reported Outcome Tools	High	20
787878787	IA_BMH_1	Diabetes screening	Medium	10
787878787	IA_BMH_12	Promoting Clinician Well-Being	High	20
787878787	IA_BMH_4	Depression screening	Medium	10
